### **Part III DETAILED ACTION**

#### ***Notice to Applicant(s)***

1. This action is responsive to the following communications: amendment filed on 8/19/05.
2. This application has been reconsidered. Claims 11 and 12 are pending.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Maeda et al (Maeda) (U.S. 6,791,703).

With respect to claims 11 and 12, Maeda discloses a computer (9) which displays a print acceptance screen (figure 6) on the basis of page data sent from a given node on a network (column 4, lines 46-63 and column 9, line 62 to column 10, line 12), the print acceptance screen

Art Unit: 2626

comprising: a first area for a user to specify a peripheral device (network URL address) to acquire print data (figure 6 and column 7, lines 12-17 and column 10, lines 12-22); a second area (the Setting section of Figure 6 and column 7, lines 27-32) for a user to specify a given condition when the peripheral device acquires the print data; and a third area (Printer section of Figure 6) for a user to specify a network printer made to print on the basis of the print data (Output Apparatus) and wherein the computer acquires the print data from the peripheral device specified in the first area in accordance with the given condition specified in the second area and sends an acquisition/print request for printing to the network printer specified in the third area (column 9, line 63 to column 10, line 67).

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2626

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
